EDUCATION

Academic City University - Accra, Ghana

Graduating June 2027

Major: Computer Science

EXPERIENCE

Naqvid Ltd - Remote (Texas, USA)

July 2026 - August 2026

Software Developer Intern

- Built a **RAG chatbot** for a Ghana Stock Exchange trading platform using **OpenAI embeddings, PostgreSQL/pgvector, and semantic search**, indexing **1,800+ documents** with metadata filtering and top-k retrieval for context-aware responses.
- Translated **Ghana CSD and ISO compliance requirements** into backend validation rules covering **20+ trading and settlement scenarios**, integrating regulatory checks directly into product workflows.
- Developed AI-powered fintech features with a distributed engineering team using **Python, REST APIs, Git, and code reviews**, contributing across implementation, testing, and technical documentation.

Voltix eg - Remote (Sadat City, Egypt)

September 2026 - October 2026

Software Developer Intern

- Engineered a **React + TypeScript healthcare analytics dashboard** for PainSignal, implementing **12 responsive interfaces** with Tailwind CSS, Context API, GSAP, and Framer Motion from design mockups.
- Built a reusable component system with **25+ shared UI primitives and design tokens**, reducing duplicated frontend code and improving consistency across application interfaces.
- Optimized frontend performance through **code splitting, lazy loading, and image optimization**, reducing initial load time by **40%** and increasing Lighthouse performance from **68 to 92**.

PROJECTS

JWB CORE

[Project Link](#)

- Architected a full-stack compliance platform that automatically evaluates digital health applications against the **AF-HIT SCORE Framework**, a custom rubric covering **FHIR interoperability, security, privacy, and app-store health requirements** across **22 criteria and 5 domains**, generating structured certification reports.
- Built a multi-language static analysis engine supporting **Python, JavaScript/TypeScript, Java, and C#**, combining AST analysis, regex rules, dependency checks, and heuristics to identify FHIR, security, privacy, and regulatory issues across **15 test repositories**.
- Built backend infrastructure (FastAPI, PostgreSQL, Redis) achieving 87% detection accuracy across 120+ seeded compliance cases, with automated PDF certification reporting.

CineStream

[Project Link](#)

- Developed a **TypeScript/Electron** media-library manager that processed **10,000+ movie and TV files**, automatically identifying and organizing media across international naming conventions.
- Engineered a classification pipeline combining **regex, fuzzy matching, tokenization, and context-aware heuristics**, achieving **94% classification accuracy** across the test dataset.
- Used async processing and atomic file operations to ensure safe, real-time media organization.

SKILLS

- **Programming languages:** Python, C++, C, C#, JavaScript, HTML, CSS, SQL, MATLAB, Java.
- **Worked with:** React, Node.js, Unity, Unreal Engine 5, Oracle, Git and GitHub, Express.js, NodeMailer, Vercel and Render, XLSX, Tailwind CSS, Framer Motion, MongoDB, PyQt5.
- **Soft Skills:** Initiative-Driven, Client Engagement, Problem Solving, Communication, Writing.

CAMPUS INVOLVEMENT

Rotaract Club, Treasurer, Academic City University

September 2025 - Present

- Managed the club's GHS 10,000+ annual budget, ensuring transparent fiscal oversight for all projects and events.
